

## MODULES

- Hydraulic Snapshot
- Swab and Surge Analysis
- Fluid Rollover Analysis
- Parametric Analysis
- Drilling Envelope

## FEATURES & OUTPUTS

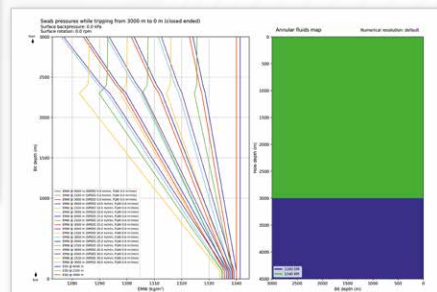

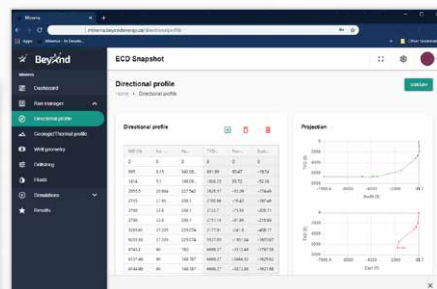

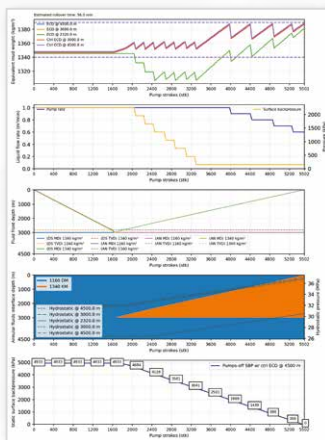

- ECD and ESD modelling
- Downhole Pressure Modeling
- Temperature Profile
- Hole Cleaning Evaluation
- Automated and Manual Swab and Surge Analysis
- Automated and Manual Fluid Rollover Analysis
- Onshore and Offshore Simulations

**Minerva Hydraulics™ is a Drilling Hydraulics software that features a range of unique and automated capabilities that make it a comprehensive well construction tool for drilling applications.**

**The software is offered as a Software as a Service (SaaS) solution, meaning that no installation is required and it can be used from any computer.**

**Minerva Hydraulics™ is a solution that enhances your collaborative workflow without the hassles and restrictions of complex licensing methods.**

**Call us to book your demo and get your FREE trial!**
