

Beyond prides itself in offering the best in class MPD Products as well as on-site MPD Supervision and MPD Engineering. As part of the MPD portfolio of products, Beyond provides MPD Technical Support and Engineering with an experienced team of Engineers that provide the customer with all their needs in Well Design and Operations Monitoring Services using state-of-the-art, in-house developed software.

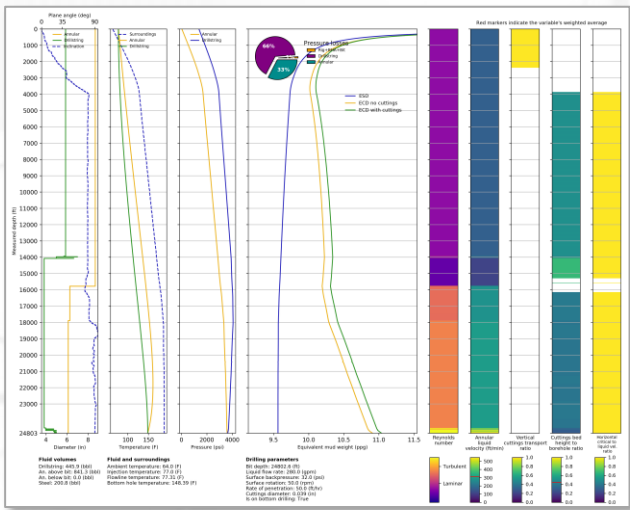

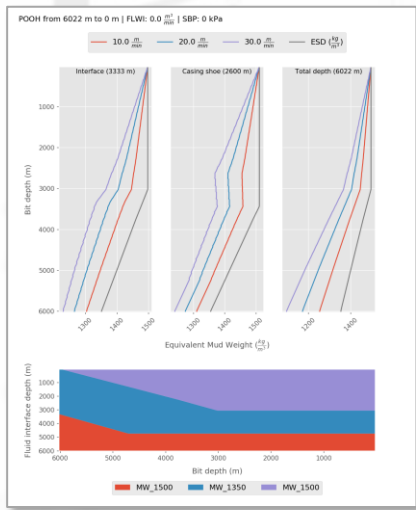

MPD Engineering Services

- MPD Feasibility Analysis
- MPD Programs
- Equivalent Circulating and Static Density Analyses
- Swab and Surge Analyses
- Mud Rollover and Cementing Schedules in MPD Mode
- Mud Density and Rheology Overview
- End of Well Reports
- Real-time Operations Monitoring and Support, including on-site Engineering

Engineering Experience

- Very Narrow Window Operations
- Horizontal Drilling in Different Pressure Profile Zones
- Flow Drilling and Multiphase Operations
- Drilling Optimization (ROP optimization, pressure-related events mitigation)
- HPHT Operations in Deep-Wells (depth > 20,000' or 6,000m)
- Cementing in MPD Mode

We do
Managed
Pressure
Drilling.
