

Multilateral open hole completion well designs in the CLEARWATER demand a fine balance of cost and production benefits from their drilling fluids. ProPore is specifically designed to provide exactly that! A highly inhibitive and breaker-free reservoir drill-in fluid that will enhance wellbore production.

## Benefits of ProPore

Using proven products with an improved approach ProPore is unlike anything on the market in Western Canada today.

- Proven superior production in Marten Hills
- Organophilic filter cake reduces skin factor while minimizing water spurt loss
- Bridging approach to solve lost circulation events putting them in the rear view mirror
- System designed to reduce lift off pressures
- Formation compatible cost efficient lubricant to push the possibilities of well design

ProPore is optimized to limit all aspects of formation damage:

- Fines Migration
- Emulsions
- Alteration of Wetting
- Swelling of Clays
- Water Invasion
- Scale Formation
- Sulfate Reducing Bacteria

**Why Drill With Oil When You Can Have All the Benefits for Less!**

# We do Drilling Fluids.
